

# FUTURE INNOVATORS

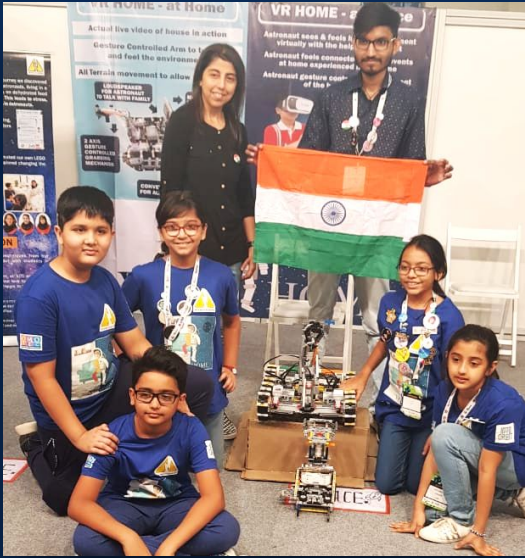

Team: LIVE WIRES

## Project: VR Home

**Team Member** - Antara, Tapasya, Dhruv, Mehak, Chaitanya

**Problem Statement** : When astronauts goes to International Space Station, they stay there for long duration without gravity, and with no sense of day, night, weather etc. they start feeling home sick which affects their mental health

**Team Blocksmiths & OMOTEC's Solution** : VR Home is a robot that stays at home and astronaut can control it using a VR Headset from ISS and can feel that he/she is at her home and they can roam around and interact with other people using the arm

## COMPONENTS USED
